(54) [Title of the Device] Agitating head.

JP 06-017644 U

(57) [Abstract]

[Object] To provide an agitating head of which cleaning is easy and foaming efficiency is high.

[Constitution] Four blades 22, 24, 26 and 28 extend sidewise from a main shaft 20 at intervals of 90 degrees. The respective blades 22, 24, 26 and 28 are composed of a support arm 22a, 24a, 26a or 28a extending diagonally sidewise from the main shaft 20 and a plurality of ribs which are extended to a holding shaft 30 being an extension of the main shaft 20. The ribs are round bars of stainless steel.
